### PROJECT DESCRIPTION / SUMMARY

Our planet is changing. We need to help it change for the better and we are asking for your help to do it. There are a lot of things that affect our planet in a bad way but the good news is that everyone can help to reduce them and do their bit for the environment.

The main task of this project is creating partner groups of students in Europe and Asia who have serious interest of recognition and protection of our nature. They will find examples of air, soil and water pollution in their area or country, take photos or videos and share them on our Facebook group site. Then they write comments (Where it was found, describe the area and reasons of pollution...etc.). The students will elaborate a strategy of environmental protection. With this project, I expect a large cooperation and involvement of the students in its activities. This will lead

its participating members (teachers and students) to improve their language skills, their competence to work with I.T., competence to work in group and their knowledge about other cultures.

**RATIONALE FOR THE PROJECT:**

- Possibility of informal education students about partner countries
- Activation of environmental protection
- Support of active cooperation inside of groups and between
- Visibility of our regions
- Obtaining skills and experiences of solving problems.

**EXPECTED CONTRIBUTION FROM ASIAN SCHOOLS/STUDENTS:**

- Localisation of nature and its problematic parts in terms of threatening biodiversity.
- Original ideas or suggestions in solving problems
- Particular possibilities of personal participation in solving problematic situations.
